

KEN CORDELE GRIFFIN ACADEMY

EIGHT WEEKS

Foundations Syllabus

Foundations of the Market is eight weeks. The aim is a working command of the map, the memo, and the inventory — not a forecast and not a job. Deliverables are written. Conversation is not a deliverable.

- Week 1** The market as an arrangement. Read the Map. File a one-page description of one venue you actually use.
- Week 2** Structure. Hours, ticks, lots, halts. Memo: what rule, if changed tomorrow, would rewrite your object.
- Week 3** Participants and instruments. Who is forced, who is optional, what rights the instrument actually contains.
- Week 4** The book. Watch one session. Record inside, depth, and what traded through it.
- Week 5** Liquidity scorecard on one object, at your size, for two different hours.
- Week 6** Risk inventory on a hypothetical claim. Cap first.
- Week 7** Information and the other side. Write Line 3 until it names a person or a mandate, not a mood.
- Week 8** Plumbing and close. Full five-line memo on one object. Office hours on Line 4 and Line 5.
